

Connect to the future

CEREC Omnicam – The gateway to Atlantis® abutment solutions

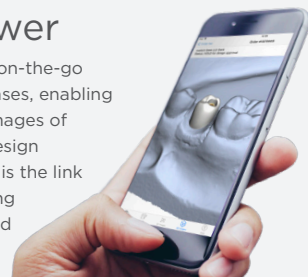

With the CEREC Omnicam intraoral scanner, you can easily access Atlantis solutions for customized treatment that is predictable, accurate and time-saving.

Incorporating Atlantis solutions streamlines your workflow without investing in additional software and equipment. You receive a patient-specific solution optimally designed and produced in line with your preferences. You get access to an open digital solution that provides the greatest flexibility, esthetics you can count on and a solid foundation of research and development to ensure the delivery of predictable and reliable results to your patients.

Contact your local Dentsply Sirona Implants representative or customer service at 800-531-3481.

Atlantis Viewer

Atlantis Viewer provides on-the-go access to your Atlantis cases, enabling you to view 2D and 3D images of Atlantis cases pending design approval. Atlantis Viewer is the link between intraoral scanning with CEREC Omnicam and final Atlantis solutions.

132

Atlantis abutments are compatible with 132 implant connections for all major implant systems.

Refer to the Atlantis abutments implant compatibility chart.
